PROJECTS

Stress Away

Created a fully funtional app on REACT using mongodb and bootstrap, that allows you to seamlessly assess your mental state through personalized questions, schedule confidential video consultations with certified professionals, and enjoy secure payments with Razorpay integration.

https://www.stressaway.in/

Restraunt App

I made a fully responsive website(UI) for a nearby restaurant which enables you to register, book a table, gives information about the menu and much more.This website was made by using HTML, CSS, JS with the help of ReactJS framework.

https://restaurant-app-22d61.web.app

Chat Application with Firebase (React)

Developed a real-time chat application using React JS. Integrated Google authentication for secure and easy login Utilized Firebase as the backend for real-time database and authentication Designed a modern and responsive user interface using Chakra UI
